## seunmulon

KA Illuminated Pushbutton Switch

## SMT momentary switch <br> concave, raised dot, Flat button

Depth behind panel : Only 12 mm

- LED Dual-Color, Multi-Color
$\square$ Terinal : Surface Mount Terminal
$\square$ Selectable with or without Click feeling.

CHARACTERISTICS

| Button size | Square : $\square 12 \mathrm{~mm}, \quad \square 15 \mathrm{~mm}, \quad \square 17.4 \mathrm{~mm}$ |
| :---: | :---: |
| Contact Material | Gold-Plated |
| Rating (Resistive Load) | DC 24 V 20 mA |
| Insulation Resistance | More than $100 \mathrm{M} \Omega$ at DC 500 V |
| Dielectric Strength | AC 1000 V RMS between N and NO terminal AC 1500 V RMS between terminals and ground $50 / 60 \mathrm{~Hz}$ for 60 sec . at normal ambient temperature and humidity |
| Contact Resistance | Less than $200 \mathrm{~m} \Omega$ at DC 6 V 0.05 A |
| Vibration Resistance | 10 to 55 Hz , Amplitude 1.5 mm |
| Mechanical Life $\quad$ Momentary | More than 3,000,000 operations |
| Electrical Life (Resistive Load) | More than 3,000,000 operations |
| Operating Force | 2.0 N max. |
| Total Travel | 4.0 mm max. |
| Weight | 4.5 g |
| Ambient Operating Temperature | $-15^{\circ} \mathrm{C}$ to $50^{\circ} \mathrm{C}$ (No Condensation) |
| Ambient Operating Humidity | 85\%RH MAX. (No Freeze) |
| Ambient Storage Temperature, Humidity | Indoors at a temperature of $25^{\circ} \mathrm{C}$ or less and relative humidity of $50 \%$ or less |

For protecting LED, use external protective resistor.

## NOTES

※1) Flat buton is only 12 mm and 15 mm Square type.
※2) In case of selecting without button (X), without filter (X), please order button and filter separately.
※3) If you request M (with click feel) for the operational feel of the housing, also specify M (with click feel) for the operational feel of the light cartridge. In case you request S (without click feel) for the operation feel of the housing, specify blank for the operational feel of the light cartridge. Other combinations cannot be selected.

## HOUSING

## NOTES

※1) If you request $M$ (with click feel) for the operational feel of the housing, also specify $M$ (with click feel) for the operational feel of the light cartridge. In case you request $S$ (without click feel) for the operation feel of the housing, specify blank for the operational feel of the light cartridge. Other combinations cannot be selected.

| Max. Forward Current IFM |  |  |  | (mA) | 25 (17) | 20 (16) | 20 (15) | 10 (7) |
| Power Dissipation |  |  | (mW) | 60 | 48 | 48 | 38 |
| DC Reverse Voltage |  |  | (v) | 5 | 10 | 5 | 5 |
| Forward Voltage |  |  | (v) | 1.9 | 4.2 | 1.8 | 3.4 |
| Dominant wavelength $\lambda \mathrm{d}$ \% |  |  | (nm) | 626 | 572 | 626 | 525 |
| Forward current under the above conditions \% |  |  | (mA) | 20 | 20 | 10 | 10 |
| Maximum Forward Current |  |  |  | Figure 1 |  | Figure 2 |  |
| Pulse Lighting | Pulse Width PW |  | ( $\mu \mathrm{s}$ ) | 400 |  | 400 | 15 |
|  | Duty Ratio DR |  |  | $10^{-1}$ |  | $10^{-1}$ |  |
|  | Allowable forward current | Ifp | (mA) | 92 |  | 92 | 50 |

Refer to the following formula to calculate external resistance values.

- Maximum forward current - Ambient temperature

## - Reference external resistor

Since LED protection resistors are not built-in, connect resistors in series referring to the table below.

| Button size | Color <br> Voltage | Red - Green (78) |  | Red - Super Green (718) |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Red | Green | Red | Super Green |
| 12 mm | DC 5V | 620 ת1/16W | 130 1 1/16W | 510 ת1/16W | 910 1 1/16W |
|  | DC 12V | 2k $\Omega 1 / 8 \mathrm{~W}$ | $1 \mathrm{k} \Omega 1 / 4 \mathrm{~W}$ | $1.6 \mathrm{k} \Omega 1 / 4 \mathrm{~W}$ | $3.6 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ |
|  | DC 24 V | $4.3 \mathrm{k} \Omega 1 / 4 \mathrm{~W}$ | $2.4 \mathrm{k} \Omega 1 / 2 \mathrm{~W}$ | $3.6 \mathrm{k} \Omega 1 / 2 \mathrm{~W}$ | 8.2k $\Omega 1 / 8 \mathrm{~W}$ |
|  | Reference forward current (mA) | 5 | 8 | 6 | 3 |
| 15 mm | DC 5V | $510 \Omega 1 / 16 \mathrm{~W}$ | 91 $\Omega 1 / 16 \mathrm{~W}$ | 360 ת1/16W | $620 \Omega 1 / 16 \mathrm{~W}$ |
|  | DC 12V | 1.6k $\Omega 1 / 4 \mathrm{~W}$ | $820 \Omega 1 / 4 \mathrm{~W}$ | $1.2 \mathrm{k} \Omega 1 / 4 \mathrm{~W}$ | $2.4 \mathrm{k} \Omega 1 / 8 \mathrm{~W}$ |
|  | DC 24 V | $3.6 \mathrm{k} \Omega 1 / 2 \mathrm{~W}$ | 2k $21 / 2 \mathrm{~W}$ | $2.7 \mathrm{k} \Omega 1 / 2 \mathrm{~W}$ | 5.6k $\Omega 1 / 4 \mathrm{~W}$ |
|  | Reference forward current (mA) | 6 | 10 | 8 | 4 |
| 17.4 mm | DC 5V | 390 ת1/16W | 56, 1/16W | 300 ת1/16W | 510 1 1/16W |
|  | DC 12V | $1.3 \mathrm{k} \Omega 1 / 4 \mathrm{~W}$ | $510 \Omega 1 / 4 \mathrm{~W}$ | $1 \mathrm{k} \Omega 1 / 4 \mathrm{~W}$ | $2 \mathrm{k} \Omega 1 / 8 \mathrm{~W}$ |
|  | DC 24 V | $2.7 \mathrm{k} \Omega 1 / 2 \mathrm{~W}$ | $1.3 \mathrm{k} \Omega 1 \mathrm{~W}$ | $2.2 \mathrm{k} \Omega 1 / 2 \mathrm{~W}$ | $4.7 \mathrm{k} \Omega 1 / 4 \mathrm{~W}$ |
|  | Reference forward current (mA) | 8 | 15 | 10 | 5 |

For resistance value calculation
https://www.sunmulon.co.jp/english/products/led.html
The resistance value can be calculated just by entering the items.

$\mathrm{Ta}=25^{\circ} \mathrm{C}$

## LED SPECIFICATIONS【Multi-Color】

| Item |  |  | Color | Red | Super Green | Super Blue |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Max. Forward Current IFM |  |  | (mA) | 50 | 35 | 25 |
| Power Dissipation |  |  | (mW) | 127 | 124 | 88 |
|  |  |  | 150 (Simultaneous lighting) |
| DC Reverse Voltage |  | $V_{R}$ |  | (V) | 5 | - | - |
| Forward Voltage |  | $V_{F}$ (Typ.) | (V) | 2.2 | 3.2 | 3.2 |
| Dominant wavelength |  | $\lambda \mathrm{d}$ \% | ( nm ) | 622 | 530 | 468 |
| Forward current under the above conditions \% |  |  | (mA) | 20 | 20 | 20 |

|  | Duty Ratio DR |  |  | $10^{-1}$ |  |  |
|  | Allowable forw | ard current | (mA) | 150 | 110 | 80 |

## Wiring Diagram

Refer to the following formula to calculate external resistance values.

$$
\mathrm{R}=\frac{\mathrm{V}_{\mathrm{DD}}-\mathrm{V}_{\mathrm{F}}}{\mathrm{IF}} \quad \begin{aligned}
& V_{D D}: \text { Supply Voltage } \\
& \\
& \\
& V_{F}: \text { Forward Voltage } \\
& \mathrm{IF}_{\mathrm{F}}
\end{aligned}
$$

- Maximum forward current - Ambient temperature

- Reference external resistor

Since LED protection resistors are not built-in, connect resistors in series referring to the table below.

| Button size | Color <br> Voltage | Red | Super Green | Super Blue |
| :---: | :---: | :---: | :---: | :---: |
| 12 mm | DC 5V | 2k $\Omega 1 / 16 \mathrm{~W}$ | 1.8k $1 / 16 \mathrm{~W}$ | $2.4 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ |
|  | DC 12V | $6.2 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $8.2 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $10 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ |
|  | DC 24 V | $13 \mathrm{k} \Omega 1 / 8 \mathrm{~W}$ | $18 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $22 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ |
|  | Reference forward current (mA) | 1.7 | 1.2 | 1 |
| 15 mm | DC 5V | $1.6 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $1.5 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $2 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ |
|  | DC 12V | $5.1 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $6.2 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $8.2 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ |
|  | DC 24 V | $11 \mathrm{k} \Omega 1 / 8 \mathrm{~W}$ | $15 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $18 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ |
|  | Reference forward current (mA) | 2 | 1.4 | 1.2 |
| 17.4 mm | DC 5V | $1.5 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $1.2 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $1.8 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ |
|  | DC 12V | $4.7 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $5.1 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ | $6.8 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ |
|  | DC 24V | $10 \mathrm{k} \Omega 1 / 8 \mathrm{~W}$ | $12 \mathrm{k} \Omega 1 / 8 \mathrm{~W}$ | $16 \mathrm{k} \Omega 1 / 16 \mathrm{~W}$ |
|  | Reference forward current (mA) | 2.2 | 1.8 | 1.4 |

## SOLDERING SPECIFICATIONS

## Soldering

(1) Conduct preliminary testing for confirming the soldering conditions.

Switches could be deformed by heat depending on the pattern and land on the PCB.
(2) The number of soldering is no more than twice, including corrective re-soldering.

When soldering repeatedly, wait at least five minutes between the first and second soldering until the work cools to room temperature. Continuous heating can result in deformity of outer contours are deterioration.

Recommended conditions for reflow soldering (When attaching single terminal)
Please set a reflow furnace referring to the remperature profile example shown below for the terminal temperature.
Deformity could result due to the heat if the product temperature exceeds $260^{\circ} \mathrm{C}$, therefore ensure that the temperature on the product surface remains below $260^{\circ} \mathrm{C}$.

| Pre-heating $:$ | $150^{\circ} \mathrm{C}$ to $180^{\circ} \mathrm{C}$ |
| ---: | :--- |
|  | 60 to 120 sec |
| Reflow $:$ | $220^{\circ} \mathrm{C}$ or above |
| within 30 to 60 sec |  |
| Solder type $:$ | Sn 96.5 |
|  | Ag 3 |
|  | Cu 0.5 |
|  | $※ \mathrm{~A} 30 \mathrm{C} 5$ (JIS indication) |

※Consult with us if you wish to attach parts continuously or in high density.

## - Manual soldering

(1) Soldering temperture: $350^{\circ} \mathrm{C}$ or less at tip of soldering iron.
(2) Soldering time : within 3 sec

## Cleaning

The switches are not washable.
Washing may cause flux and foreign mtter on the PCB to get inside the swtch along with cleaning fluid, and could cause failure.

【Temperature profile example wherlead-free solder is used】

(1) When recommend confirming thichness of the PCB, pattern on the PCB and land prior to volume production.
(2) Handle the PCB carefully when dividing the PCB could get inside the switches.
Avoid piling assembled PCB.

## SURFACE MOUNTING PROCESS

The housing of KA series switches is delivered in a tray. Tray specifications are as shown below.

Section A details

B-B cross-section

In ordered in 32 units or less, the order will be delivered in a product box. Trays, if needed, can be ordered by specifying the following product name and type.
Tray Part no. KA-4600

The light cartridge is always delivered in a product box.

## ASSEMBLY

- Mounting the light cartridge

To combine the light cartridge with the housing, remove the seal attached to the housing. There is a proper direction for combining the light cartridge with the housing.
As shown in the above diagram, insert the light cartridge by aligning the projection part A with the groove part $A$, and the projection part $B$ with the groove part $B$.

## PRECAUTIONS FOR CORRECT USE

- Handling of switches
(1) Usage environment

Prior to setting the product in the environment for actual usage, check that no corrosive or other gas is emitted from component parts in the vicinity.
Avoid using in atmospheres containing sulfidizing gas (H2S, SO2), ammonia gas (NH3), nitrate gas (NH3), chlorine gas (CL2) or other corrosive gases, or under high temperature or humidity.
(2) Contact errors could result if silicon is present in the vicinity of the switch.

Remove the source of silicon if silicon oil, silicon filler, silicon wire or other silicon products are present around the switch.
(3) Dust-prevention measures

Avoid using the switches in places where dust is generated.
(4) Waterproofing and drip-proofing

The switches are not waterproof or drip-proof. Avoid installing or using them in places where they might be splashed with liquids.
(5) Automatic mounting

The switches can be mounted automatically on baseboards, but this may not be possible with some types of mounting machines. We recommend checking beforehand when using the product this way.
(6) Strength of terminals

Note that if a terminal is bent or twisted, its strength declines and the terminal could break.

- Matters for caution when storing
(1) Storage environment

When storing the product, please take full consideration that the atmosphere, humidity and other storage conditions could affect the ease of soldering of terminals and packaging functions.
-Packaging material is expected to age more rapidly under high temperatures and humidity. We recommend storing the products indoors at temperatures up to 258 C and relative humidity up to $50 \%$.
-Avoid storing the products in an environment with sulfidizing or other corrosive gases.
-Avoid direct sunlight and dust.
(2) Storage conditions

Store the products in the packaging.
Use products promptly after opening the packaging, and store the remaining products in an area free of gas, humidity and other factors witch ight affect performance.
Handle the products carefully to prevent damage to terminals from deforming.

## - Character films

The character film is not included in the package. To use the character film, use a heat resistant film of 0.1 mm thickness or less.
Please refer to the figure below.

## Safety Precautions for All Illuminted Pushbutton Switches

## 1. Notes on contents of Catalogs

(1) Rated values, performance values, and specification values of Sumulon products listed in this catalog are values acquired under respective conditions in independent testing, and do not guarantee values gained in combined conditions.
(2) The ambient operating temperature(humidity) is guaranteed by evaluation based on characteristics, and does not guarantee continuous use for a long period of time near the upper or lower limit of the ambient operating temperature(humidity) or permanent use at that temperature(humidity).
(3) Reference data and reference values listed in catalogs are for reference purposes only, and do not guarantee that the product will always operate appropriately in that range.
(4) The specifications / appearance and accessories of Sunmulon products listed in catalogs are subject to change or termination of sales without notice, for improvemnet or other reasons.
(5) The content of catalogs is subject to change without notice.

## 2. Note on applications

(1) If using Sunmulon products in combination with other products, confirm the following suitability by yourself. Sunmulon shall provide no guarantees regarding the combination suitability.
(a) Regulations, satndards, or laws to which your machinery, equipment, ect. must conform
(b) Functionality and safety of your machinery and equipment
(2) Wiring and installation that ensures the Sunmulon product used in your system, machine, device, or the like can perform and function according to its specifications.
(3) When using Sunmulon products, be cautious when implementing the following.
(a) Use of Sunmulon products with sufficient allowance for rating and performance.
(b) Safety design, including redundant design and malfunction prevention design that prevents other danger and damage even in the event that Sumulon product fails.
(4) Sunmulon products are designed and manufactured as general-purpose products for general industrial products. They are not intended for use in the following applications, and in the event that you use Sunmulon product for these applications, unless otherwise agreed upon between you and Sunmulon, Sunmulon shall provide no guarantees whatsoever regarding Sunmulon products.
(a) Safety devices intended for human body protection
(b) Direct control of transport equipmnt (railroads / airplanes / ships / vehicles / vehicle instruments, etc.)
(c) Space equipment, submarine equipment
(d) Nuclear power control equipment, radiation related equipment
(e) Combustion equipment, electric heat equipment
(f) Disaster prevention and security equipment
(g) Elevating equipment
(h) Amusement facilities
(i) Facilities subject to government or industry regulations
(j) Use in applications that require a high degree of safety, any other equipment, instruments, or the like that could endanger life or human health

## 3. Warranty

(1) The warranty period for Sunmulon products shall be 1 year after purchase or delivery to the specified location.
(2) Warranty scope should a failure occur in Sunmulon product during the above warranty period for reasons attributable to Sunmulon, then Sunmulon shall provide that product, free of charge, the same quantity. Further, in no event shall liability of Sunmulon exceed the individual price of the product on which liability is asserted.
(3) Failures cause by the following reasons shall be deemed outside the scope of this warranty.
(a) The product was handled or used deviating from conditions / environment listed in the catalogs
(b) The failure was caused by reasons other than Sunmulon product
(c) Modification or repair was performed by a party other than Sunmulon
(d) Replacement of maintenance parts, installation of accessories, or the like was not performed properly in accordance with the user's manual and catalogs
(e) The failure could not have been predicted with the scientific and technical standards at the time when the product was shipped from Sunmulon
(f) The failure was due to other causes not attributable to Sunmulon (including cases of force majeure such as natural disasters and other disasters)
(4) The warranty listed in this Safety Precautions is the full and complete warranty for Sunmulon products, and Sunmulon shall bear no liability whatsoever regarding special damages, indirect damages, incidental damages, or passive damages that occurred due to Sunmulon product.

## 4. Handling precautions for switch

(1) Do not perform wiring with power supplied to the switch. Do not touch the terminals or other charged parts of the switch while power is being supplied. Doing so may result in electric shock.
(2) Be careful of electrostatic breakdown when handling.
(3) Do not drop or otherwise apply strong force to the switch.
(4) Do not place heavy objects on the switch.
(5) Do not operate or use the housing (switch unit) by itself. Use the switch with assembled the illuminated part (LED module or button).
(6) Pushbutton switches are designed to be operated by fingertips. Operating the switch using a sharp object (screwdrivers, tweezers, etc.), hard object (metal, etc.), or with a large or sudden force, may cause deform or damage the switch.
(7) Do not use the switch under loads that exceed the rated switching capacity or other contact ratings. Doing so may result in welding of the contact, or burnout accidents.

## Safety Precautions for All Illuminted Pushbutton Switches

(8) For inductive load, the arc by back EMF may cause contact failure. Insertion of arc prevention circuit as the following is recommended.

| Circuit | Element selection | Circuit | Element selection |
| :---: | :---: | :---: | :---: |
|  | C : 1 to $0.5 \mu \mathrm{~F} \times$ switch current ( A ) <br> $\mathrm{R}: 0.5$ to $1 \Omega \times$ switch voltage (V) |  | The diode must withstand a peak inverse voltage 4 times higher than the power supply voltage and regarding a forward current must as high or higher than the load current. |
|  | Determine ideal capacitance and resistance values through testing. |  | Use a varistor that can withstand the power supply voltage sufficiently. (1.5 times or more) |

(9) Following circuits show examples of an anti-chattering circuit.

(10) Illumination
(a) Do not apply a voltage between the LED terminal that is greater than the rated voltage. Doing so may damage the LED, cause lighting failure.
(b) LEDs cannot be lit directly by AC circuit should be provided rectifier smoothing circuit for products other than AC input type.

Correct

Incorrect

(c) When wiring, pay attention to the polarity of the terminals.
(d) Simultaneous lighting may not be possible with Dual-Color illumination or Split-Face illumination (2, 3, or 4 split illumination), check the catalog.
(e) Apply voltage directly to LEDs of Non-built-in resistor type will damage the LEDs, so connect an appropriate external resistor.
(11) Wiring
(a) Do not apply a soldering iron to the switch housing. Doing so may deform the terminals and cause defects.
(b) See catalog for models compatible with flux prevention measures terminal. Be careful not to allow flux to panetrate sliding parts such as buttons. Use non-corrosive rosin solution as flux for dip soldering.
(c) For soldering other than flux-preventive models, hand solder with the terminals facing down to prevent flux from penetrating into the switch.

Correct Incorrect

(d) The housing of KA, K2, and K9 series are designed for reflow soldering.
(e) Use the appropriate wire size for the applied voltage and current, and solder properly. Use of the product with incomplete soldering may cause abnormal heat generation, resulting in a fire hazard.
(f) After wiring is completed, maintain an appropriate insulation distance.

## Safety Precautions for All Illuminted Pushbutton Switches

(12) Usage environment
(a) Do not use in the presence of flammable or explosive gases such as gasoline, thinner, LPG, etc.
(b) Avoid using the product in places where corrosive or silicon gas is generated, high temperature, high humidity, sea breeze or direct sunlight
(c) Provide appropriate protection when using the product in places where it is exposed to water, oil, metal powder, or dust.
(d) Do not use the product in a place subject to vibration or shock. It may cause malfunction or damage.
(e) When installed in a close grouping or continuously lit, the ambient temperature may exceed the specified value due to heat generation. Take measures such as ventilation and lowering the operating voltage.
(f) When checking the actual equipment, load conditions and operating environment should be the same as the actual operating conditions.
(g) The ambient temperature for storage is $-25^{\circ} \mathrm{C}$ to $65^{\circ} \mathrm{C}$ (No freeze, no condensation).
(13) When wiping off dirt on the exterior of the switch and accessories such as side plates, wipe lightly with a soft, dry cloth. Organic solvents such as thinner, benzene, alcohol, or other acidic chemicals may cause deformation, discoloration, or malfunction.
(14) Store the product away from malignant gases, dust, high temperature and high humidity, and keep it in our packing condition.
(15) When removing the illuminated part (or button) from the alternate switch housing, switch state should be in a free state.

## Correct Incorrect

Removal in a locked state may cause malfunction or damage to alternate switch.
(16) Periodic inspection and replacement
(a) Although mechanical and electrical durability are listed in the specifications column, deterioration of various parts (deterioration of resins and corrosion of metal parts) is possible due to the operating environment and method of use. We ask that you implement inspections for Sunmulon products to prevent accidents from occurring by conducting periodic inspections and replacements.
(b) When the switch is left unused or stored for long periods, contact reliability may deteriorate due to oxidation of contacts, which may cause continuity failure, etc. Therefore, it is necessary to check the operation before use.
(17) Service scope

The price of Sunmulon products do not include the cost of services, such as dispatching technicians.

[^0]:    ※ When wiring in a matrix, take measures to prevent reverse current since protective elements are incorporated in the LED color Super Green and Super Blue.
