

## How to install TA Guard cover

Hook the inner projection of the guard cover onto the flange of the housing from one side and incorporate it into both sides.

- ① Hook the inner projection of the guard cover and push the other side until click.
- ② Check that the guard cover is properly fitted to the flange.
- ③ Mounting on panel.

### Note

When installing the guard cover afterwards with the switch mounted on the panel, install the switch in the same way as above with the switch body lifted off the panel. Insufficient fitting may cause coming off.
